

Hello, this is Mr. Silver. I am the IT Director at First Academy Leesburg. In these directions I will show you how to download the ParentPlus app.

If you have already downloaded the app on your mobile device and you need help logging in, please email me at jsilver@faleesburg.com

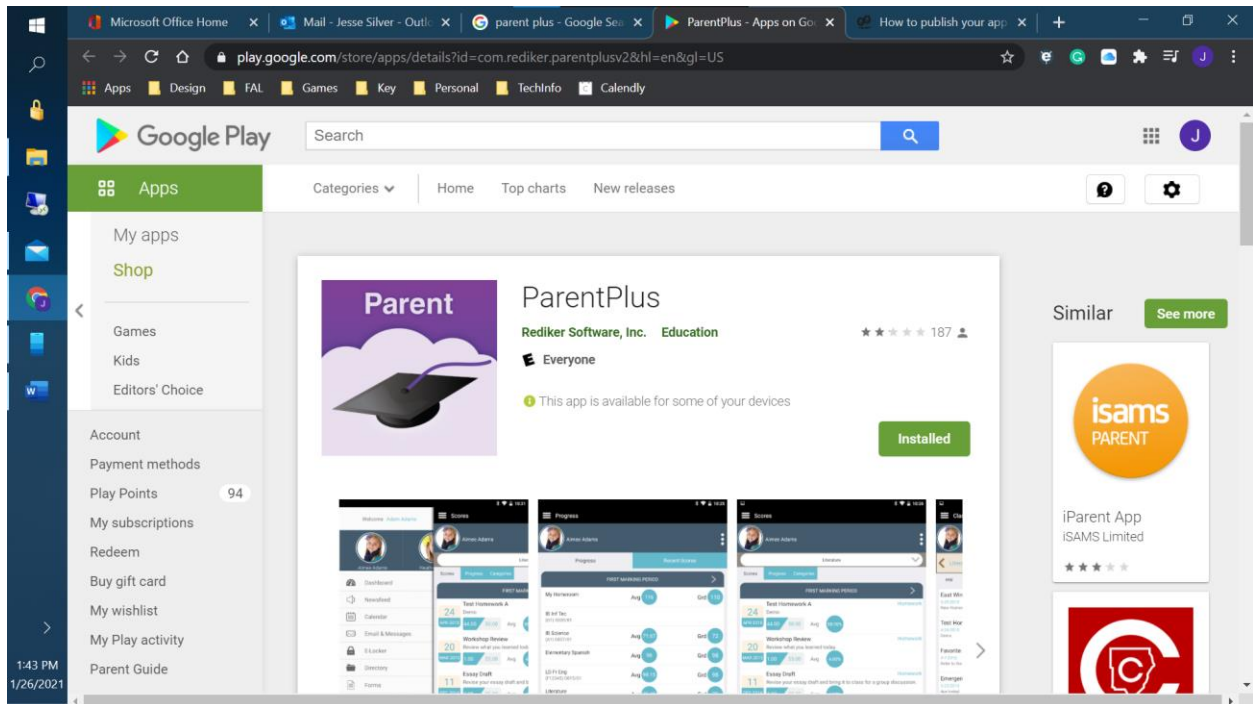

For everyone else, let's download the ParentPlus app.

The ParentPlus app is compatible with the Apple App Store and the Google Play Store.

Once the store is open, search for ParentPlus, no spaces.

The app is purple and white.

At this point, simply install the app and that's it.

When you install the mobile app on your mobile device, please make sure you allow notifications from the app. On my Android device, when I install an app, notifications are automatically enabled.

This is very important. If for some reason we need to send a schoolwide notification and our primary system is down. Sending a push notification to your phone through the app is our backup protocol.

If you need help enabling notifications, please email me at jsilver@faleesburg.com
